

PRODUCT DISCONTINUANCE NOTIFICATION

PDN1926

Description

Intel Programmable Solutions Group (“Intel PSG”, formerly Altera) is discontinuing the following Field Programmable Gate Array (FPGA) Flip Chip products that currently use leaded solder bumps on the first level interconnect:

- Arria II
- Arria V (< 365 KLEs)
- Stratix III (< 70 KLEs)
- Stratix IV (≤ 110 KLEs)

Reason for Change

This discontinuance is in accordance with [ADV1828](#), which details an update to the EU Restriction of Hazardous Substances (RoHS) Directive Exemption 15. The change will affect FPGA Flip Chip products that currently use leaded solder bumps on the first level interconnect.

Customers are advised to migrate to part numbers compliant with the latest change in the EU RoHS Directive Exemption 15 (designated with a “G” suffix ^{see Note 1}) or perform a last time buy on non-compliant products (designated with a “N” suffix) impacted by this discontinuance notice.

Note 1:

The “G” suffix part numbers use the same silicon, product specifications, and are generally form, fit and function equivalent to the “N” suffix part numbers.

Stratix III and Arria II GX (lidless) have changes to the package. Please refer to the notes section in the list of affected products.
